Instructions

Sysslan IT Solutions

- Update your LinkedIn profile to highlight your accomplishments, such as offer letters or internship certificates from Sysslan IT Solutions. Mention and tag Sysslan IT Solutions in your posts. Use relevant hashtags like #SysslanITSolutions #SysslanExperience #FutureWithSysslan to showcase your professional association.

- Ensure that all work is original and avoid plagiarism or code duplication, as such violations may result in termination of the internship and impact future opportunities with Sysslan IT Solutions.

- Create a video presentation of your completed tasks and share it on LinkedIn. Tag Sysslan IT Solutions and use hashtags like #SysslanInnovation #SysslanITSolutions #SysslanProjects to engage with our professional community.

Sysslan IT Solutions

SUBMISSION

- Create a professional video highlighting your internship projects and accomplishments.

- Share the video on LinkedIn to demonstrate your work and build credibility with your professional network. Make sure to tag Sysslan IT Solutions in your post so the company is notified of your achievements.

- A submission form will be provided later. In the meantime, continue working on your tasks and maintain separate files for each level of work.

- When posting the video on LinkedIn, use the following hashtags to increase visibility and engagement:
- #SysslanITSolutions #Sysslan #SysslanProjects

- You can also include additional hashtags relevant to your specific internship domain to further showcase your expertise.

Title: Medical Camp Registration Portal

Project Overview

The Medical Camp Registration Portal is a simple web-based application designed to help users view available medical camps and register for participation. The project focuses on clean UI structure, smooth navigation, basic backend data handling, and a simple end-to-end user flow from camp viewing to successful registration.

Objectives:

- Display medical camp information clearly
- Allow users to register for camps easily
- Store and manage participant data
- Ensure responsiveness and usability
- Deliver a complete, functional mini web application

Sysslan IT Solutions

Level 1 – Project Setup & Basic Pages

Description:
Set up the foundation of the project with basic pages and navigation.

Tasks:

- Task 1: Create the basic project structure and homepage titled “Medical Camp Registration Portal”
- Task 2: Add pages/sections for Home, Camp Details, Registration, and Contact
- Task 3: Create a simple navigation menu for smooth page transitions
- Task 4: Add a short description explaining the purpose of the medical camp

Skills Gained:
HTML structure, navigation design, content organization

Level 2 – Camp Information Display

Sysslan IT Solutions

Description:

Display details of medical camps in a structured and user-friendly format.

Tasks:

- Task 1: Create a section to display camp name, date, and location
- Task 2: Add multiple camp entries to demonstrate listing functionality
- Task 3: Style the camp details section for clarity and readability
- Task 4: Ensure camp details adapt properly to different screen sizes

Skills Gained:

UI layout design, responsive design basics, CSS styling

Sysslan IT Solutions

Level 3 – Registration Functionality

Description:
Enable users to register for medical camps using a structured form.

Tasks:

- Task 1: Create a registration form with fields such as name, age, contact number, and camp selection
- Task 2: Validate inputs to ensure all required fields are completed
- Task 3: Submit registration data to backend logic or application handler
- Task 4: Display a confirmation message after successful registration

Skills Gained:
Form handling, input validation, user interaction flow

Level 4 – Data Storage & Management

Description:
Store, retrieve, and manage participant registration data.

Tasks:

- Task 1: Store participant details in a database or file system
- Task 2: Retrieve and display a list of registered participants
- Task 3: Create a simple admin view to monitor registrations
- Task 4: Handle basic errors such as missing or invalid data

Skills Gained:
Data storage concepts, CRUD operations, error handling

Sysslan IT Solutions

Sysslan IT Solutions

Level 5 – Final Review & Completion

Description:

Finalize the project by improving UI, testing functionality, and ensuring reliability.

Tasks:

- Task 1: Improve overall UI styling for a clean and professional look
- Task 2: Verify navigation links and forms work correctly
- Task 3: Test the complete registration flow end-to-end
- Task 4: Prepare the final deployable version of the project

Skills Gained:

Testing, debugging, UI refinement, project finalization
